Enclosed is an iPod Touch that was seized as evidence in a homicide which occurred on October 13<sup>th</sup>, 2013. There has been witness testimony in this case alleging that the owner of the iPod and victim of the homicide, Christian Arenas, may have been using the text applications on the iPod to communicate with a person, or persons, responsible for his death.

I request that your organization, the Southwest Regional Computer Crime Institute, conduct any and all testing necessary to extract all phone calls, call histories, texts and text histories available through the various applications utilized on the iPod. I also request that any and all photographs and videos stored on the phone be extracted.

I'd like to thank you in advance for your efforts. We have had much success with your extraction methods and hold you in high regard as a great resource for our Department in the area of cell phone and computer technology analysis.
